Office Action Summary

Art Unit: 1712

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wnuk alone or in view of Noda '590, '116 and '470. The rejection is applied as in the previous Office Action. Applicant argues that there is no motivation to combine the references and that Wnuk does not disclose the PHA required in the claims. The PHA copolymers required in the claims are disclosed at col. 14, lines 22-43 of Wnuk where the Noda references are incorporated by reference. Thus, where Wnuk specifically incorporates the Noda references for the purpose of teaching PHA copolymers that can be used, there is clear motivation to use the PHA copolymers taught by the Noda references whether they are considered as part of the Wnuk disclosure or are combined with Wnuk. Further, Wnuk teaches that PLA enhances melt strength and reduces blocking of compositions containing PHA. See col. 26, lines 8-31. Thus, the use of PLA with the PHA copolymers of the Noda references would be expected to reduce stickiness.

Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matsui. The rejection is applied as in the previous Office Action. Applicant argues that Matsui does not disclose PHA copolymer or conventional PHB/PHBV. Conventional PHBV is taught at col. 40, line 15 and PHA copolymers encompassed by the claims are taught at col. 40, lines 16-17.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 1712

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
